SITUATION SUMMARY

Magnitude 6.0 Earthquake, American Canyon, Napa County

SITUATION UPDATE:

On Sunday, August 24, 2014, at 0320 Hours PST, a magnitude 6.0 earthquake struck five miles northwest of American Canyon, CA. The earthquake nucleated at a depth of 10.8km. The shaking intensity in American Canyon and Napa from the “South Napa Earthquake” was a “VII” on the Modified Mercalli Scale, suggesting very strong shaking occurred in the Napa County area. Ground shaking was felt as far south as Salinas, east to Sacramento, and north to Ukiah. USGS estimates that aftershocks should be expected for the next week. The Cal OES Earthquake and Tsunami Duty Officer is in contact with the United States Geological Survey and California Geological Survey and will provide updates.

Aftershocks:

As of August 31, 2014 there have been 117 aftershocks. Napa felt a 3.2 jolt at 0300 this morning. In the last 10 days, there have now been five earthquakes magnitude 3.0 or greater centered nearby.

Area Weather Forecast

Quiet weather is expected across the San Francisco and Monterey Bay Region all work week.

Power and Utilities

Per CUEA:

- All communications functioning in normal range, AT&T has a COLT (cell on light truck) and mobile charging trailer on site in downtown Napa.

Water

- There is still a boil water order for any area with a loss of pressure.
- Water stations are located at staying open through the week:
 - Las Flores Center on Linda Vista Avenue and Pearl Street (1 block west of Main
- St. Helena Hospital (System No. 2800625) –
 - Result from St. Helena Hospital came back absent for total coliform and E. coli on 08/30/14.
 - The turbidity of sources was investigated and found to be minimal. The main turbidity problems are associated with their storage tanks. Contacts have been provided to the water system for tank cleaners.
- City of Napa (System No. 2810003): UPDATE: Reports of 8 water leaks that will be addressed by staff on Tuesday 9/2/14.
- It was strongly recommended that those parts of the distribution system where significant damage has occurred because of the earthquake be fully replaced in order to ensure a reliable water system going forward.
- Particularly important in at least two areas: (1) the reservoir "B" tank and (2) distribution system pipelines in locations where multiple breaks have occurred.

The infrastructure above was installed from the 1930s to the 1960s. The impact of the earthquake on the aging infrastructure will likely result in ongoing distribution failures that may compromise the safety and integrity of the water system in the future if left with interim fixes.

Schools Status/Closures

- Stonebridge Elementary in the Napa Valley School District will remain closed the rest of the week.

ACTIVE WEATHER WARNINGS, WATCHES and ADVISORIES:

- http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

An upper high pressure ridge south of the forecast area will bring a warm and mostly sunny Labor Day to northwest California. Early morning low clouds over Humboldt Bay and the Eel River Valley will give way to sunshine. More seasonable weather is expected by mid to late week with continued dry conditions.

San Francisco Weather:

High pressure building along the California coast will result in mostly sunny skies and warm afternoon temperatures on Labor Day. Temperatures will then cool on Tuesday and Wednesday as an upper trough develops near the West Coast. Dry conditions will prevail except for possible patchy night and morning drizzle in coastal areas around midweek.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Dry and warm weather will continue for the forecast area through at least midweek. Near to below normal daytime high temperatures are then expected Wednesday through Saturday.

Hanford Weather:

Mostly clear skies and steady temperatures will continue through this week while dry, westerly flow prevails over the forecast area.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA

Los Angeles Weather:

Upper level high pressure over the region will move southeastward as a weak upper trough slowly approaches the West Coast today through midweek. This will bring a cooling trend to the forecast area through Wednesday with daytime temperatures falling to below seasonal normals. Below normal temperatures will continue Thursday and Friday, and then some warming is expected over the weekend as high pressure builds back into the area.

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

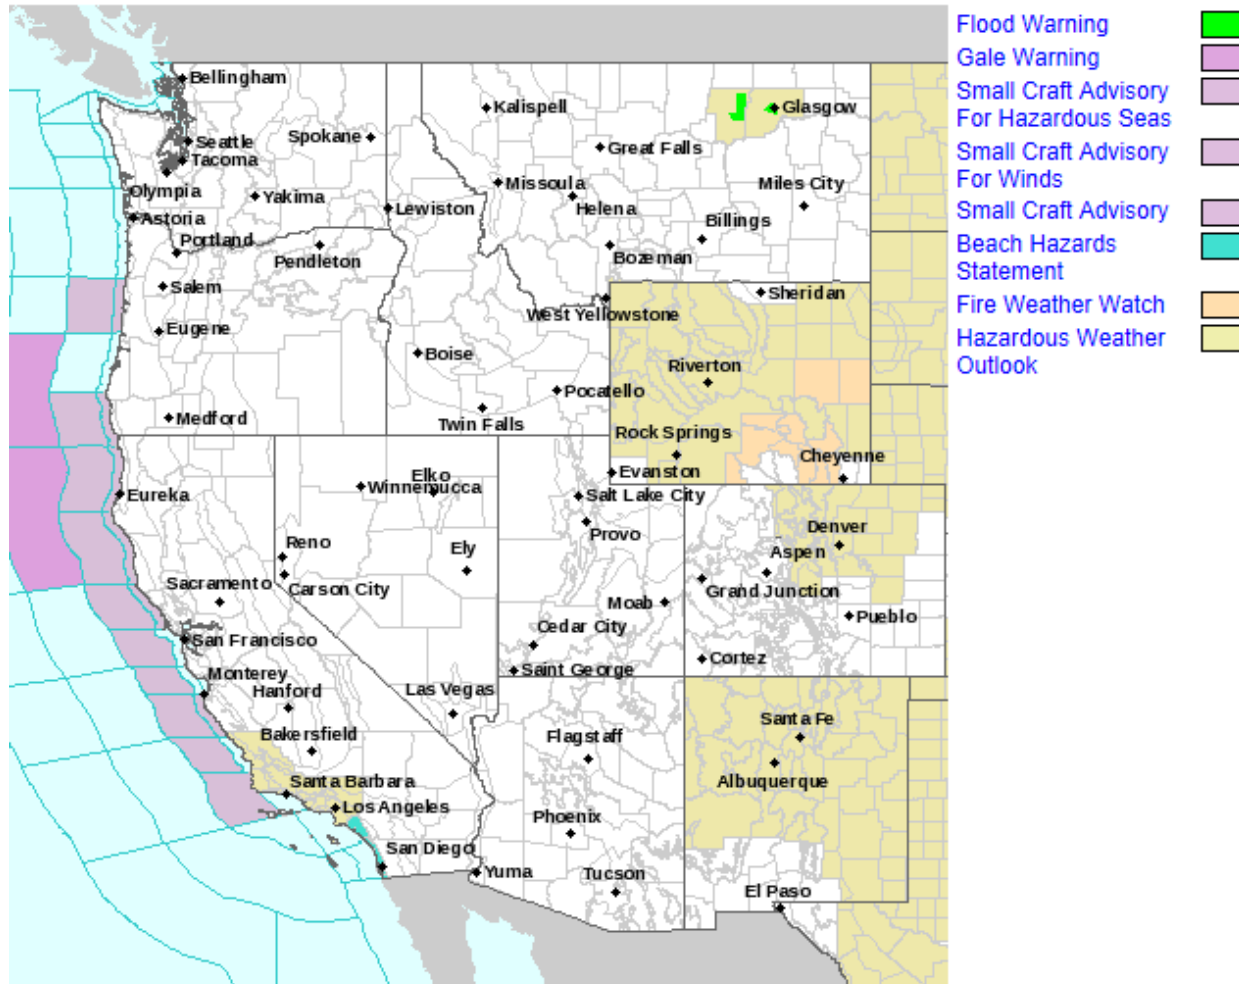

Through midweek, a low pressure system to the north will bring slightly stronger onshore flow with slow cooling and gusty west winds in the mountains and deserts each late afternoon through late evening. A weak coastal eddy will bring slow deepening of the marine layer into lower portions of the inland valleys through Wednesday. Toward next weekend, high pressure to the south may begin to expand northward bringing slow warming.

Southeast California Weather:

Above normal temperatures will continue through the majority of the week under mostly dry conditions. Moisture will make a gradual return into the region during the late week. By the weekend, a deeper tropical moisture profile may begin to work into the region bringing increasing humidities and cloud cover with slight storm chances back in the forecast over the Lower Colorado River Valley.
